## Introduction

IN publishing this reprint of a booklet issued by us some time ago, we call the attention of all architects, engineers, and iron workers to our brands of Galvanized and Black Sheet Steel. So many brands are now offered, many of them of doubtful quality, that buyers should accept only a make like our own on which they can always rely.

## "QUEEN'S HEAD"

## STANDARD OF THE WORLD

For over fifty years has held confidence of Canadian buyers as the BEST quality on the market.

It is better now than ever, as the coating which formerly peeled on severe bends, has been toughened to stand such work without making coating lighter.

Every sheet is guaranteed and will be replaced if defective.

It Works and It Wears!

#### GALVANIZED SHEETS FOR WORKING UP

Table of standard sizes showing approximate weights per lb., per square foot, per sheet, and per bundle (without bands) and the number of sheets per bundle, and per case of about half a ton.

### 14 Gauge-3.345 lbs. or 53 1/2 oz. per square foot

Size of Sheet	Weight per Sheet	Sheets per Bundle	Weight per Bundle	Sheets per hal ton cas	
6'×24"	40.14	4	160	27 ½	
6'×30"	50.17	3	150	22	
6'×36"	60.21	3	180	18	
7' ×24"	46.83	4	187	23 ½	
7' ×30"	58.53	3	175	18 ½	
7' ×36"	70.24	2	140	15 ½	
8' ×24"	53.52	3	160	20 }	
8' ×30"	66.90	3	200	16 }	
8' ×36"	80.28	2	160	13 }	
10' ×24"	66.90	3	200	163	
10' ×30"	83.62	2	167	133	
10' ×36"	100.35	2	200	11	

#### 16 Gauge-2.62 lbs. or 41.9 oz. per square foot

6'×24"	31.44	5	157	35 1/4
6' ×30"	39.30	4	157	28
6'×36"	47.16	3	141	231/4
7'×24"	36.68	4	146	30
7'×30"	45.85	4	183	241/4
7'×36"	55.02	4 3	165	20
8'×24"	41.92	4	167	261/4
8'×30"	52.40	3	157	21
8'×36"	62.88	3	188	171/4
10'×24"	52.40	3	157	21

10' ×30''	16.77	9	150	66	
10' ×36''	20.13	8	161	55	

Insist on getting "QUEEN'S HEAD," No other is "Just as Good."

## "REDCLIFFE"

# Corrugating Sheets

## "Redcliffe" Brand

Has a beautiful bright finish, is more heavily coated than other makes, is soft, true to gauge, and in all respects suitable for corruguating. For an honest, durable roofing sheet, specify

"REDCLIFFE"

#### AVERAGE WEIGHT PER SHEET, IN LBS., CORRUGATED

Length	18 Gauge	20 Gauge	Gauge	24 Gauge	26 Gauge	28 Gauge
5 feet	2914	24	1984	1534	1134	934
6 "	35	29	2334	1834	1312	1112
7 11	41	34	2736	22	15 1/2	1312
8 11	47	3814	3132	26	18	1516
9 "	5236	4319	3519	28	2034	1714
10 "	5834	48 16	3935	3114	22 12	101

This table applies to sheets of ten 2 1/2 inch corrugations, measuring about 33 inches wide, over all.

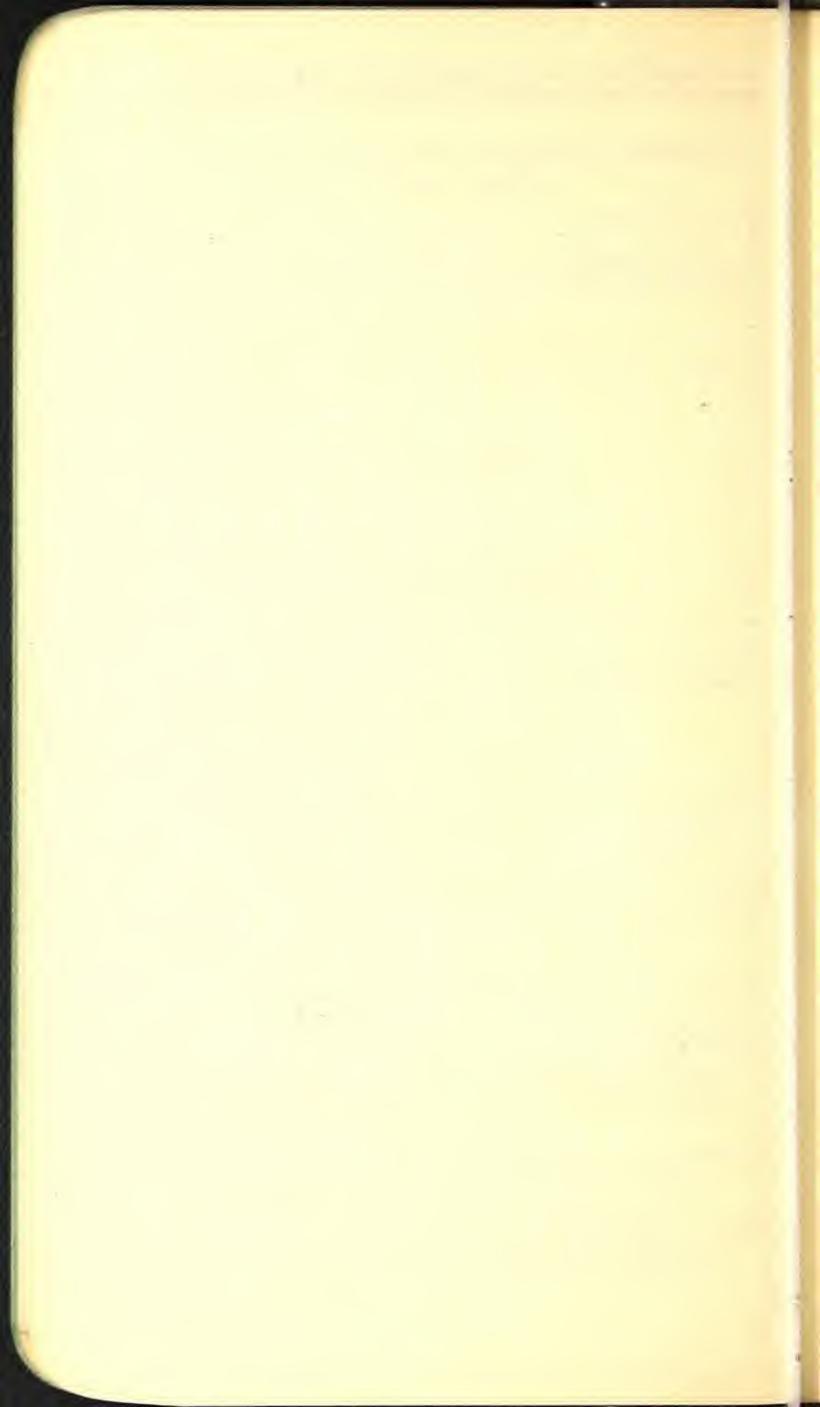

## WEIGHTS PER SQUARE OF "ORB" AND "REDCLIFFE" CORRUGATED IRON

18G	20G	22G	24G	26G	28G
215	177	146	118	84	7114

Particular attention is drawn to these weights, which will be found much lower than cheaper sheets of other makes.

While above weights are not guaranteed, they can, always be depended upon.

These weights are for 100 square feet, Corrugated without allowance for laps.

"Southern Cross"

and

"Globe"

Steel Sheets

## BLACK SHEETS

"SOUTHERN CROSS" C.R.C.A.

Dead Flat Sheets, free from scale, smooth finish, of best working up quality.

"GLOBE" (Close Annealed).

Not quite equal to "Southern Cross", but also free from buckles and scale and much superior to other sheets sold as same grade.

## MOTOR BODY-SILVER FINISH.

A very smooth, bright finish, dead flat and suitable for deep drawing. Used for Motor Bodies, Fenders, etc. also other work where exceptional finish is required.

A variety of other special grades also produced for Metal Furniture, Vitreous Enamelling and other particular classes of work.

## LIST OF STANDARD SIZES OF BLACK SHEETS

## HOW TO CALCULATE APPROXIMATELY THE CONTENTS OF SQUARE, RECTANGULAR AND CIRCULAR TANKS

Square or Rectangular—Multiply the length by the breadth and the product by the depth; the result multiplied by 6¼ will give the contents in gallons. Example:—Tank 4 feet long, 4 feet high, 5 feet deep.

4 x 4 ≡ 16 x 5 ≡ 80 x 6¼ ≡ 500 gallons.

Circular—Multiply the diameter by itself, then multiply the product by the depth, and the result by 5.

Example:—Tank 5 feet diameter, 6 feet deep.

 $5 \times 5 \equiv 25 \times 6 \equiv 150 \times 5 \equiv 750 \text{ gallons.}$ 

Water—A cubic foot of water contains nearly 61/4 gallons (6.2321) and weighs a fraction over 62 pounds.

While we cannot guarantee the tables in this book to be absolutely correct, we have compiled same from the most reliable sources and taken every care to have them free from errors.

#### BLACK AND POLISHED CANADA PLATES

#### TINPLATE WEIGHTS—NET AND GROSS

Nominally, a box of IC 14 × 20, 112 sheets, weighs 108 lbs, net, but actually 107 lbs. is a very good average weight, though good Charcoal plates should run rather heavier. The following tables give approximate net and gross weight of the standard sizes:—

SUBSTANCE	SIZE	Sheets	Net Wgt.	Gross Wgt.	Thick- ness on B.G.	
ICL 80 lbs " 85 lbs " 90 lbs " 95 lbs " 100 lbs	14 × 20 14 × 20 14 × 20 14 × 20 14 × 20	112 112 112 112 112 112	80 85 90 95 100	86 91 96 102 107	32.5 32.1 31.6 31.1 30.6

#### USES OF DIFFERENT GAUGES

- Birmingham Gauge—or New Birmingham Gauge B.G. It is the standard in Great Britain and Canada for sheets and hoops, and unless specially agreed upon, British sheets and hoops are rolled to this gauge.
- British Imperial Wire Gauge, W. G. or S. W. G.—
  It is used throughout Britain and by Canadian wire mills for gauging wire and is the Canadian Customs standard for Wire, Sheets and Hoops.
  Also used for Tubes, Copper and Brass Sheets.
- Stubs or Warrington Wire Gauge.—Largely used by wire makers, especially in the U.S.
- Brown & Sharpe or American Standard Wire Gauge.—The standard of the brass makers in the U.S., and largely used for gauging sheets and wire for electrical purposes in the U.S. and Canada.
- American Steel and Wire—formerly Washburn & Moen.—Used by American Wire makers as the standard for all ordinary Iron and Steel Wire.
- U.S. Standard Plate and Sheet Gauge.—This gauge is the Standard for Iron and Steel Plates and Sheets in the U.S. It is very similar to the B.G. in leading numbers.
